IN THE CLAIMS:

Please cancel Claims 16 and 17 without prejudice.

Please add the following Claim 24.

--24. The moulding composition of Claim 2 wherein component E is AlO(OH).--

Please replace Claims 2, 6, 7, 9, 10-15 and 23 with the following.

2. (Thrice Amended, Clean) A thermoplastic moulding composition consisting essentially of:

A) 40 to 99 parts by weight of at least one of aromatic polycarbonate and polyester carbonate;

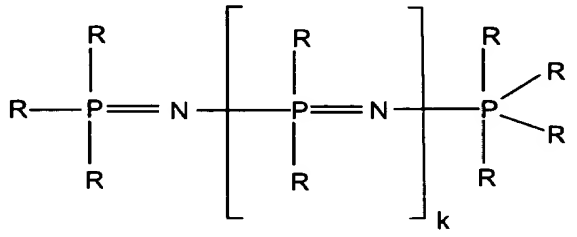
B) 0.5 to 60 parts by weight of graft polymer comprising,

B.1) 5 to 95 wt.% of one or more vinyl monomers, and

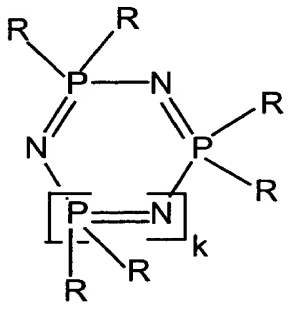
B.2) 95 to 5 wt.% of one or more grafting backbones having a glass transition temperature of <10°C;

C) 0 to 45 parts by weight of at least one thermoplastic polymer selected from at least one member of the group consisting of vinyl (co)polymers and polyalkylene terephthalates;

D) 0.1 to 50 parts by weight of at least one member selected from the group consisting of phosphazenes represented by the following formula (Ia) and phosphazenes represented by the following formula (Ib),



(Ia),



(Ib),

C4

in which

R is in each case identical or different and denotes (i) at least one member selected from the group consisting of amino and C_1 to C_8 alkyl, in each case optionally halogenated; and (ii) at least one member selected from the group consisting of C_1 to C_8 alkoxy, C_5 to C_6 cycloalkyl, C_6 to C_{20} aryl and C_7 to C_{12} aralkyl, in each case optionally substituted by at least one member selected from the group consisting of alkyl and halogen, and

k denotes 0 or a number from 1 to 15;

E) 0.5 to 40 parts by weight of finely divided inorganic powder having an average particle diameter of less than or equal to 200 nm;

F) 0 to 5 parts by weight of fluorinated polyolefin; and

C4

G) optionally at least one additive selected from the group consisting of lubricants, mould release agents, nucleating agents, antistatic agents, stabilisers, dyes and pigments.

6. (Thrice Amended, Clean) The moulding composition of Claim 2, wherein vinyl monomers B.1 are mixtures prepared from

B.1.1 50 to 99 parts by weight of at least one member selected from the group consisting of vinyl aromatics, ring-substituted vinyl aromatics and methacrylic acid (C_1-C_8)-alkyl esters, and

C5

B.1.2 1 to 50 parts by weight of at least one member selected from the group consisting of vinyl cyanides, (meth)acrylic acid (C_1-C_8)-alkyl esters, anhydrides of unsaturated carboxylic acids and imides of unsaturated carboxylic acids.

7. (Thrice Amended, Clean) The moulding composition of Claim 2, wherein the grafting backbone B.2) is a rubber selected from at least one member of the group consisting of diene rubbers, EP(D)M rubbers, acrylate, polyurethane, silicone, chloroprene and ethylene/vinyl acetate rubbers.

9. (Thrice Amended, Clean) The moulding composition of Claim 2, wherein component E is at least one polar compound selected from the group consisting of one or more metals of main groups 1 to 5 and one or more metals of subgroups 1 to 8 of the periodic system, with at least one element selected from the group consisting of oxygen, hydrogen, sulfur, phosphorus, boron, carbon, nitrogen and silicon.

C6

10. (Thrice Amended, Clean) The moulding composition of Claim 9, wherein component E is at least one polar compound selected from the group consisting of one or more metals of main groups 2 to 5 and one or more metals of subgroups 4 to 8 of the periodic system, with at least one element selected from the group

consisting of oxygen, hydrogen, sulfur, phosphorus, boron, carbon, nitrogen and silicon.

11. (Thrice Amended, Clean) The moulding composition of Claim 10, wherein component E is at least one polar compound selected from the group consisting of one or more metals of main groups 3 to 5 and one or more metals of subgroups 4 to 8 of the periodic system, with at least one element selected from the group consisting of oxygen, hydrogen, sulfur, phosphorus, boron, carbon, nitrogen and silicon.

12. (Thrice Amended, Clean) The moulding composition of Claim 2, wherein component E is at least one member selected from the group consisting of oxide, hydroxide, hydrous oxide, sulfate, sulfite, sulfide, carbonate, carbide, nitrate, nitrite, nitride, borate, silicate, phosphate, hydride, phosphite and phosphonate.

13. (Twice Amended, Clean) The moulding composition of Claim 2, wherein component E is selected from the group consisting of oxides, phosphates and hydroxides.

14. (Thrice Amended, Clean) The moulding composition of Claim 13, wherein component E is selected from the group consisting of TiO_2, SiO_2, SnO_2, ZnO, ZnS, boehmite, ZrO_2, Al_2O_3, aluminum phosphates, iron oxides, TiN, WC, AlO(OH), Sb_2O_3, Na_2SO_4, vanadium oxides, zinc borate, silicates, doped compounds and mixtures thereof.

15. (Thrice Amended, Clean) The moulding composition of Claim 2, wherein component E is selected from the group consisting of hydrated aluminum oxides, TiO_2 and mixtures thereof.

23. (Once Amended, Clean) The molding composition of Claim 14 wherein said silicates are selected from at least one member of the group consisting of Al silicates, Mg silicates, 1-dimensional silicates, 2-dimensional silicates and 3-dimensional silicates.
